Jo Gunn Antenna Company will be Aluma: A Will-Burt Company HAM radio tower's exclusive distributor.

July 22, 2024

Aluma: A Will-Burt Company has proudly manufactured aluminum guyed and unguyed towers for HAM Radio, HR, or UHF/VHF applications for 50 years. Constructed of extruded aluminum tubing, Aluma HAM Radio Towers are lightweight and strong, reaching heights of up to 100 ft. / 30 m. All towers are rigged to allow the sections to telescope simultaneously using stainless steel cables and pulleys.

In a recent agreement, Jo Gunn Antenna Company will be an exclusive stocking distributor of Aluma: A Will-Burt Company HAM Radio Towers in the United States. This will include all amateur radio tower options including Standard Duty, Extra Heavy-Duty, and Extra-Extra Heavy-Duty. As a stocking distributor, Jo Gunn will deliver your orders quickly and efficiently.

Jo Gunn Antenna Company, located in Cresson, TX, has been in the amateur and citizens band radio industry since 1967 and manufactures its own line of antennas. With a rich legacy of delivering unparalleled signal clarity and performance, Jo Gunn Antenna Company is focused on continuing to develop top-of-the-line products. Jo Gunn's future is poised for significant growth, promising game-changing advancements, and unmatched performance

About Jo Gunn Antenna Company:

Established in 1967, Jo Gunn Antenna Company quickly grew beyond its humble beginnings, fueled by the CB radio craze of the 60s and 70s, and earned a reputation as one of the premier antenna manufacturers in the country. In 1984, Jo Gunn Antenna Company transitioned to new ownership, which marked a pivotal era for the company - investing significant time, money, and expertise to refine its product lines. As they elevated their antennas to new heights in the CB radio market, they also began exploring the amateur radio market, broadening their reach and innovation.

In 2018, long-time customer Eddie Yates and his wife Gale took the helm at Jo Gunn Antenna Company. Over the next four years, Eddie and Gale revitalized Jo Gunn, reconfiguring classic antenna designs and pioneering new HF/amateur radio antennas. In 2022, the Di Iulio family purchased Jo Gunn Antenna Company and has since continued its proud legacy. With a robust business background and a skilled team of RF and mechanical engineers, the Di Iulio's are dedicated to innovation and focused on developing top-of-the-line products.

About The Will-Burt Company:

The Will-Burt Company (www.willburt.com), headquartered in Orrville, Ohio, USA, is the world's premier manufacturer of mobile telescoping masts, towers, trailer systems, and pan and tilt positioners. We offer virtually every mobile payload elevation solution and full integration services for defense, government, first responders, telecommunications, energy production and other markets. Will-Burt also offers contract manufacturing, metal fabrication, powder-coating, and rapid prototyping services. Will-Burt is an international company with offices and manufacturing in the USA, United Kingdom, Germany, Turkiye, and Singapore. All manufacturing locations are backed by a certified ISO 9001:2015 Quality Management System. Incorporated in 1918, Will-Burt is 100% employee-owned and is classified as a small business.
